

# Application of Internet+ Field Survey Technology in China's Land Management

Jue Zeng, Director (China, PR)

**Key words:** Cadastre; Digital cadastre; Land management; Internet+, Field survey, land survey

## SUMMARY

The field survey is one of the important links of land management in China. The field survey technique is related several fields of land management, such as land use change monitoring, illegal land use monitoring, land survey etc. In recent years, China Land Surveying and Planning Institute is exploring a method to combine the Internet+ and the "3S" technology to conduct field survey and the new method has been applied in land management nationwide. Field survey technology based on the Internet + creates the new models of land survey with high efficiency and ensures the authenticity of the survey data.
