THE NATIONAL GEOSPATIAL CONFERENCE

Collaboration, Innovation and Resilience: Championing a Digital Generation

Brisbane, Australia 6–10 April

FIG Standards Network – ISO/TC211 Geodetic Registry Update

FIG Working Week 2025, Brisbane, Australia

Nic Donnelly – FIG Liaison to ISO/TC211

6-10 April 2025 in Brisbane, Australia
Presented at the FIG Working Week 2025

PLATINUM SPONSORS

ISO/TC211 Overview

- **ISO/TC 211 Scope**
 - Focus on standardisation of geographic/location-based information
- **Standards for Geographic Information**
 - Fundamental concepts of geographic information characteristics and management
 - Specifies methods, tools, and services for data management
 - Data management includes acquiring, processing, analyzing, accessing, presenting, and publishing data
- **Integration with Other Standards**
 - Links to appropriate standards for information technology and data
 - Provides a framework for developing sector-specific applications using geographic data
 - Strong relationship with OGC (some joint standards)

ISO/TC211 Recent Changes

- **59th Plenary Meeting**

- Held in Sydney, Australia from 11-15 November 2024
- Hybrid meeting format

- **30th Anniversary**

- Celebrated 30 years since the first plenary in Oslo, Norway (1994)

- **Leadership Transition**

- Final plenary under Mr. Peter Parslow (UK) as chairman
- Chairmanship passed to Ms. Sandra Brantebäck (Sweden)

ISO Geodetic Registry

- **ISO Geodetic Registry Overview**
 - Structured database of coordinate reference systems (CRS) and transformations
 - Accessible through an online registry system
 - Includes only systems and transformations of international application
- **ISO Standards Conformance**
 - ISO 19111 (Spatial referencing by coordinates)
 - ISO 19127 (Geodetic register)
 - ISO 19135-1 (Procedures for item registration - Part 1: Fundamentals)

ISO Geodetic Registry

The screenshot shows the ISO Geodetic Registry website interface. At the top, it says "ISO Geodetic Registry" and "Viewing register as of 2025-03-24 01:08:00 UTC". Below this is a navigation bar with "Browse" and "Home" buttons. A sidebar on the left shows "Item classes" with a tree view: "Datums" (Engineering Datum, Geodetic Datum, Vertical Datum) and "Coordinate reference systems" (Compound CRS, Engineering CRS, Geodetic CRS, Projected CRS). The "Coordinate reference systems" section is highlighted. The main content area displays a search bar with "NZGD2000" entered and a list of search results:

reg. item	Count	Description
reg. item	66	NZGD2000 deformation model files
reg. item	81	NZGD2000 Deformation Model
reg. item	199	New Zealand Geodetic Datum 2000
reg. item	222	NZGD2000 - XYZ
reg. item	287	NZGD2000 - LatLonEht
reg. item	293	NZGD2000 - LatLon

ISO Geodetic Registry

66 NZGD2000 deformation model files

Register item ⓘ Coordinate Operation Parameter ⓘ ✓ valid

GR Identifier:

66

Name:

NZGD2000 deformation model files

Aliases: (no items to show)

Remarks:

The name of the zip file containing all the files required to apply a deformation model consisting of one or more sub-models.

Minimum Occurrences:

Information Sources: (2 total)

1. Title:

NZGD2000 Deformation Model Format (Version 1.0)
