

# The Survey of ISRAEL

## National Digital Twin

Engine of innovation,  
collaboration and  
growth Opportunities

Hagi Ronen – CEO, The Survey of Israel

# Israel main challenges

National security needs

Housing crisis

Infrastructure coordination

Transportation

Energy

Climate and environment

It's OK, you're not alone

**Sounds familiar.**

**WHAT DO  
WE HAVE IN  
COMMON?**

Surveying

GIS

Mapping

PROBLEM SOLVING

Vectors

Cadaster

Aerial Imagery

Spatial Data

**How Mapping agencies  
helps to solve problems?**

# Location based decisions !

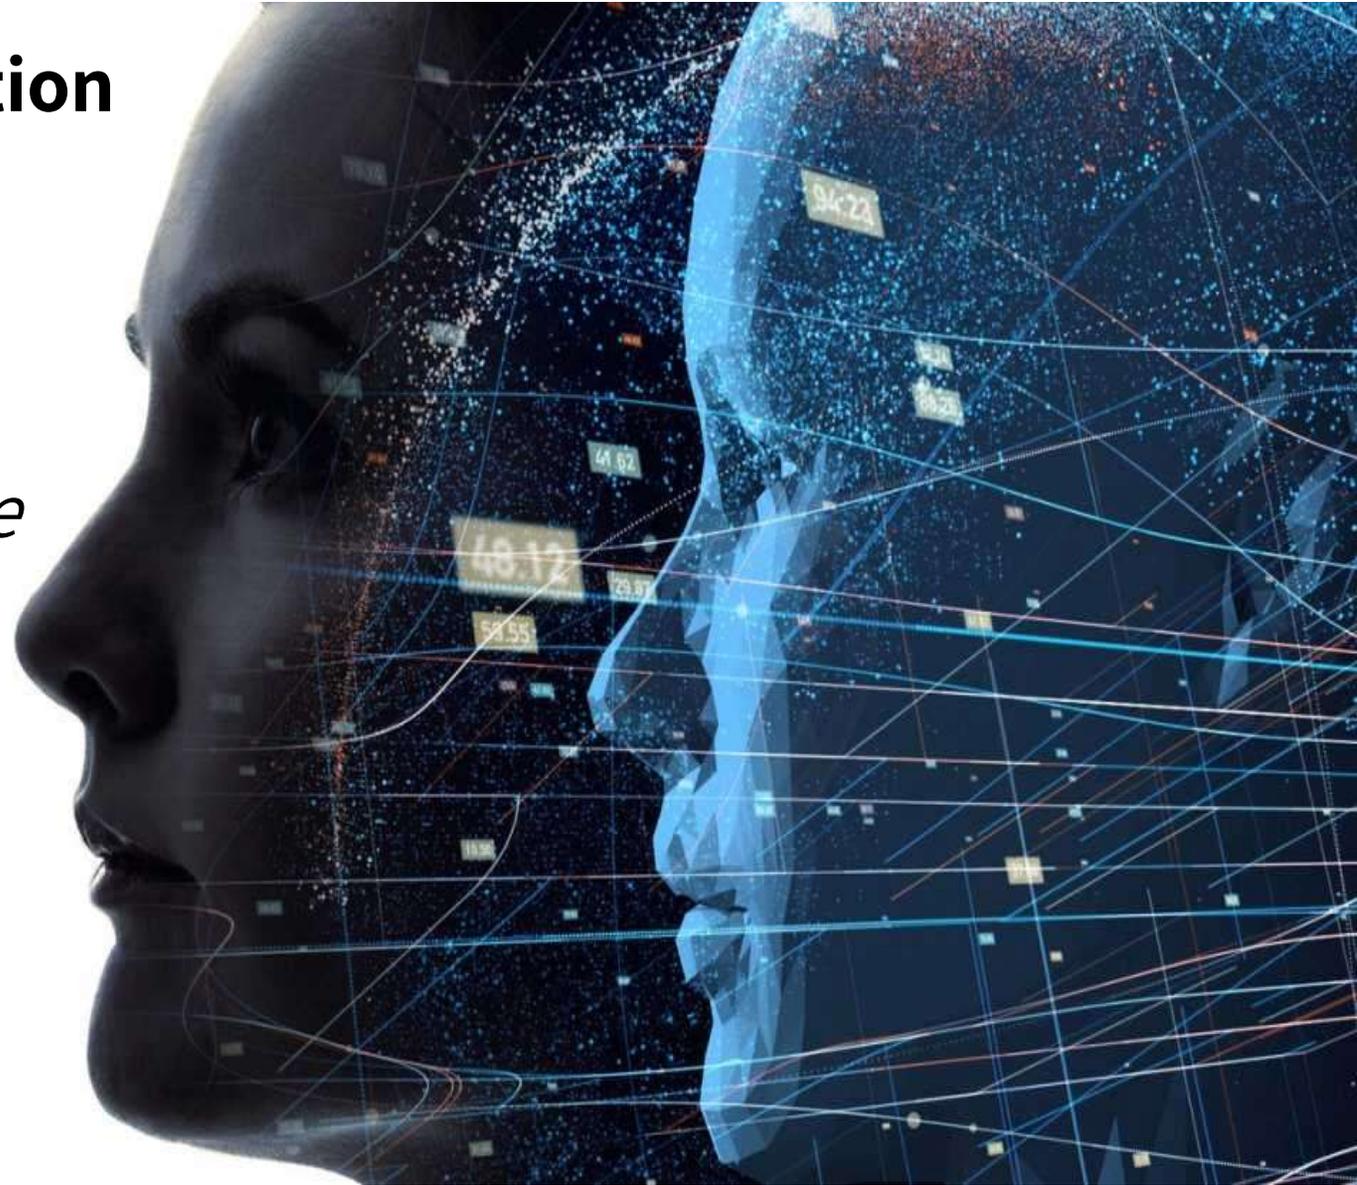

# NDT – National Digital Twin

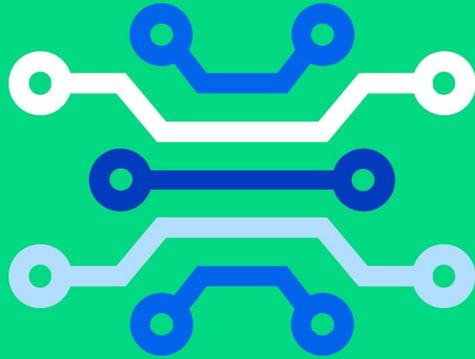

## Digital Twin definition

*digital, dynamic,  
up-to-date, accurate  
representation of  
objects, processes,  
and systems in the  
physical world.*

# The 3 Pillars of National Digital Twin

**Data**

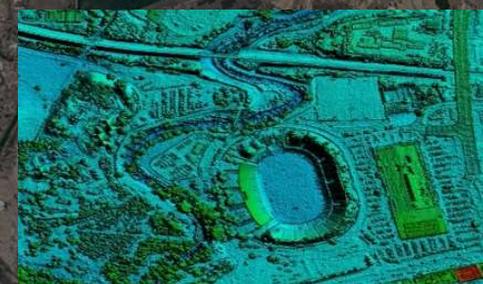

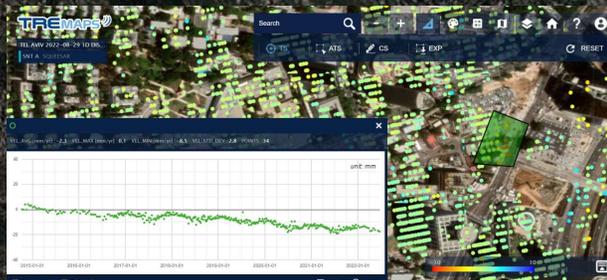

**Technology**

**Collaboration**

# Data – Building the digital twin of reality

- From satellite to under ground
- Diverse products (vertical, oblique, ground)
- Variable resolutions
- Accuracy on demand
- Fast response

# Data via Governance

## Cad to GIS

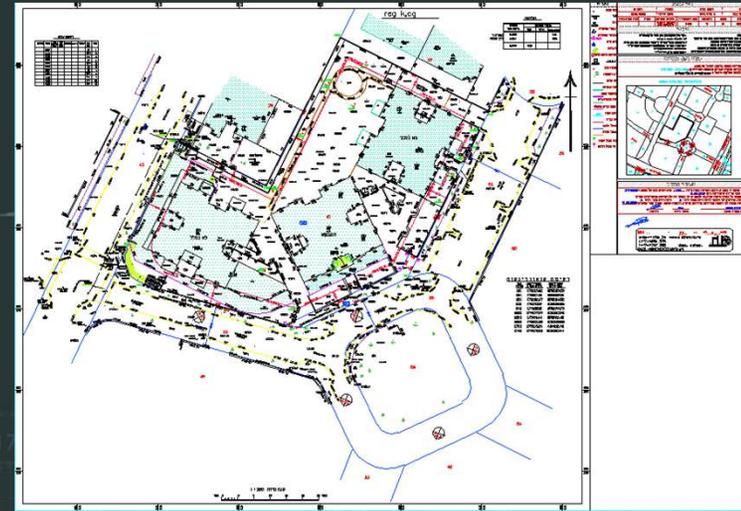

### Local – Municipal - National

- Cadaster Maps
- As made maps
- Engineering Survey
- Planning, Licensing, Registration

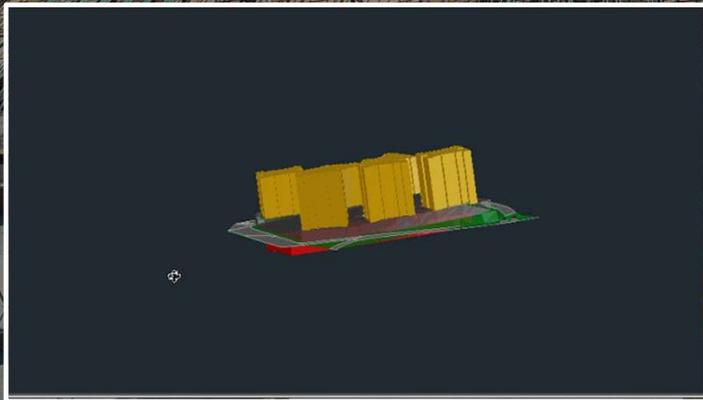

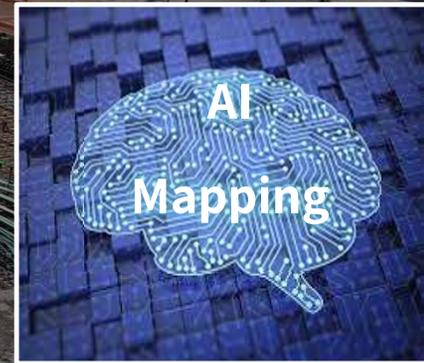

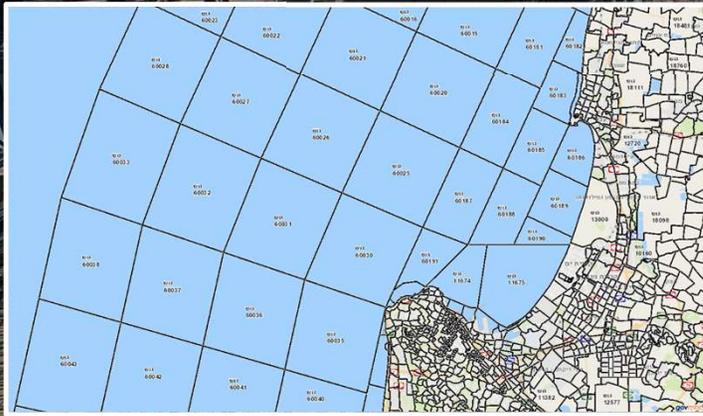

Cad

GIS

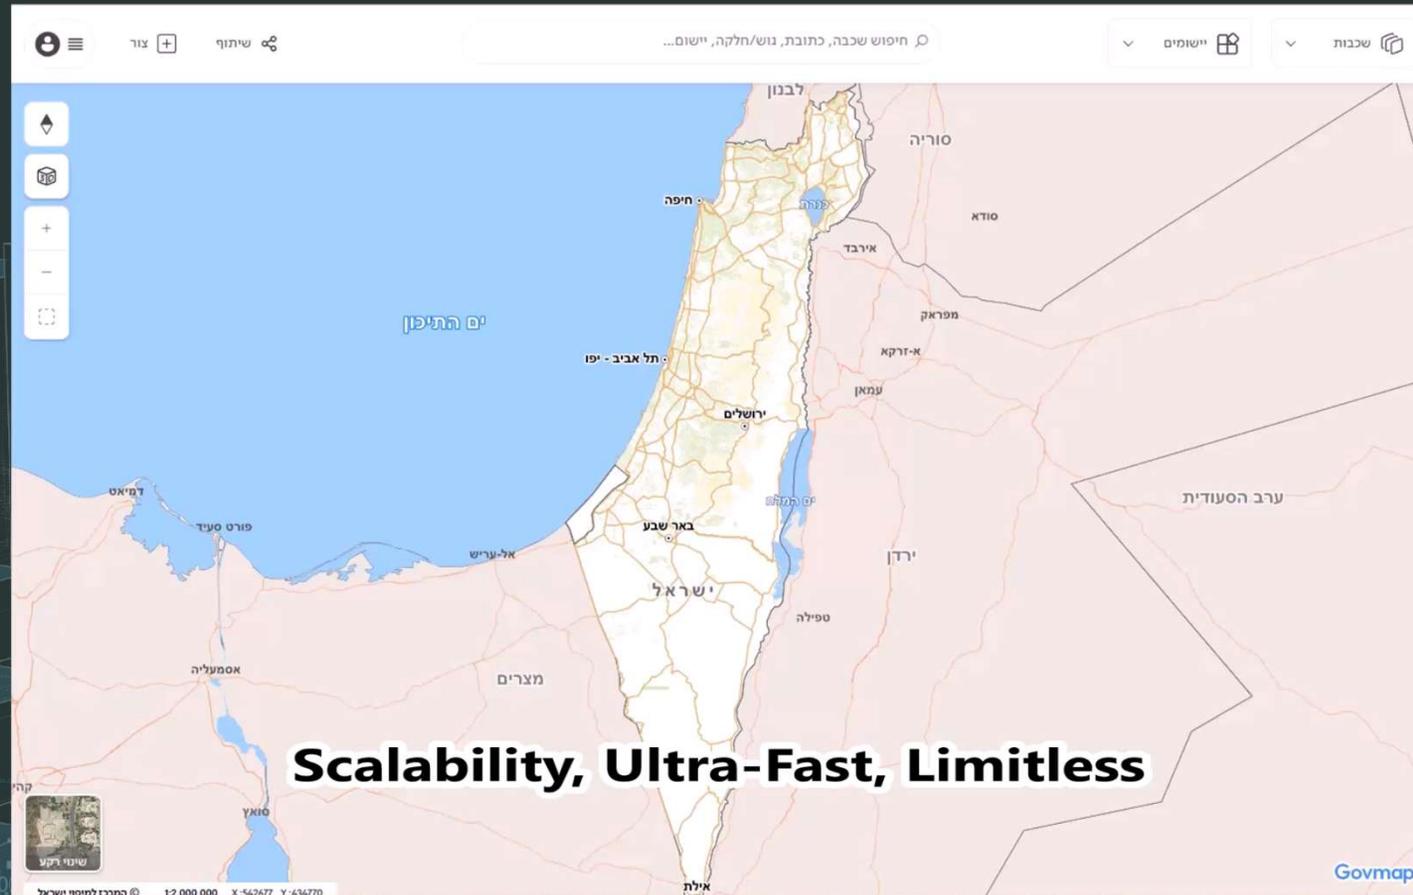

# Technology – The need to rebuild Necessity of a digital twin

# Platform – National Geospatial Portal

- Open source code
- AWS cloud base
- Limitless
- Scalability
- 3D Build-in engine
- Generic API
- Offline

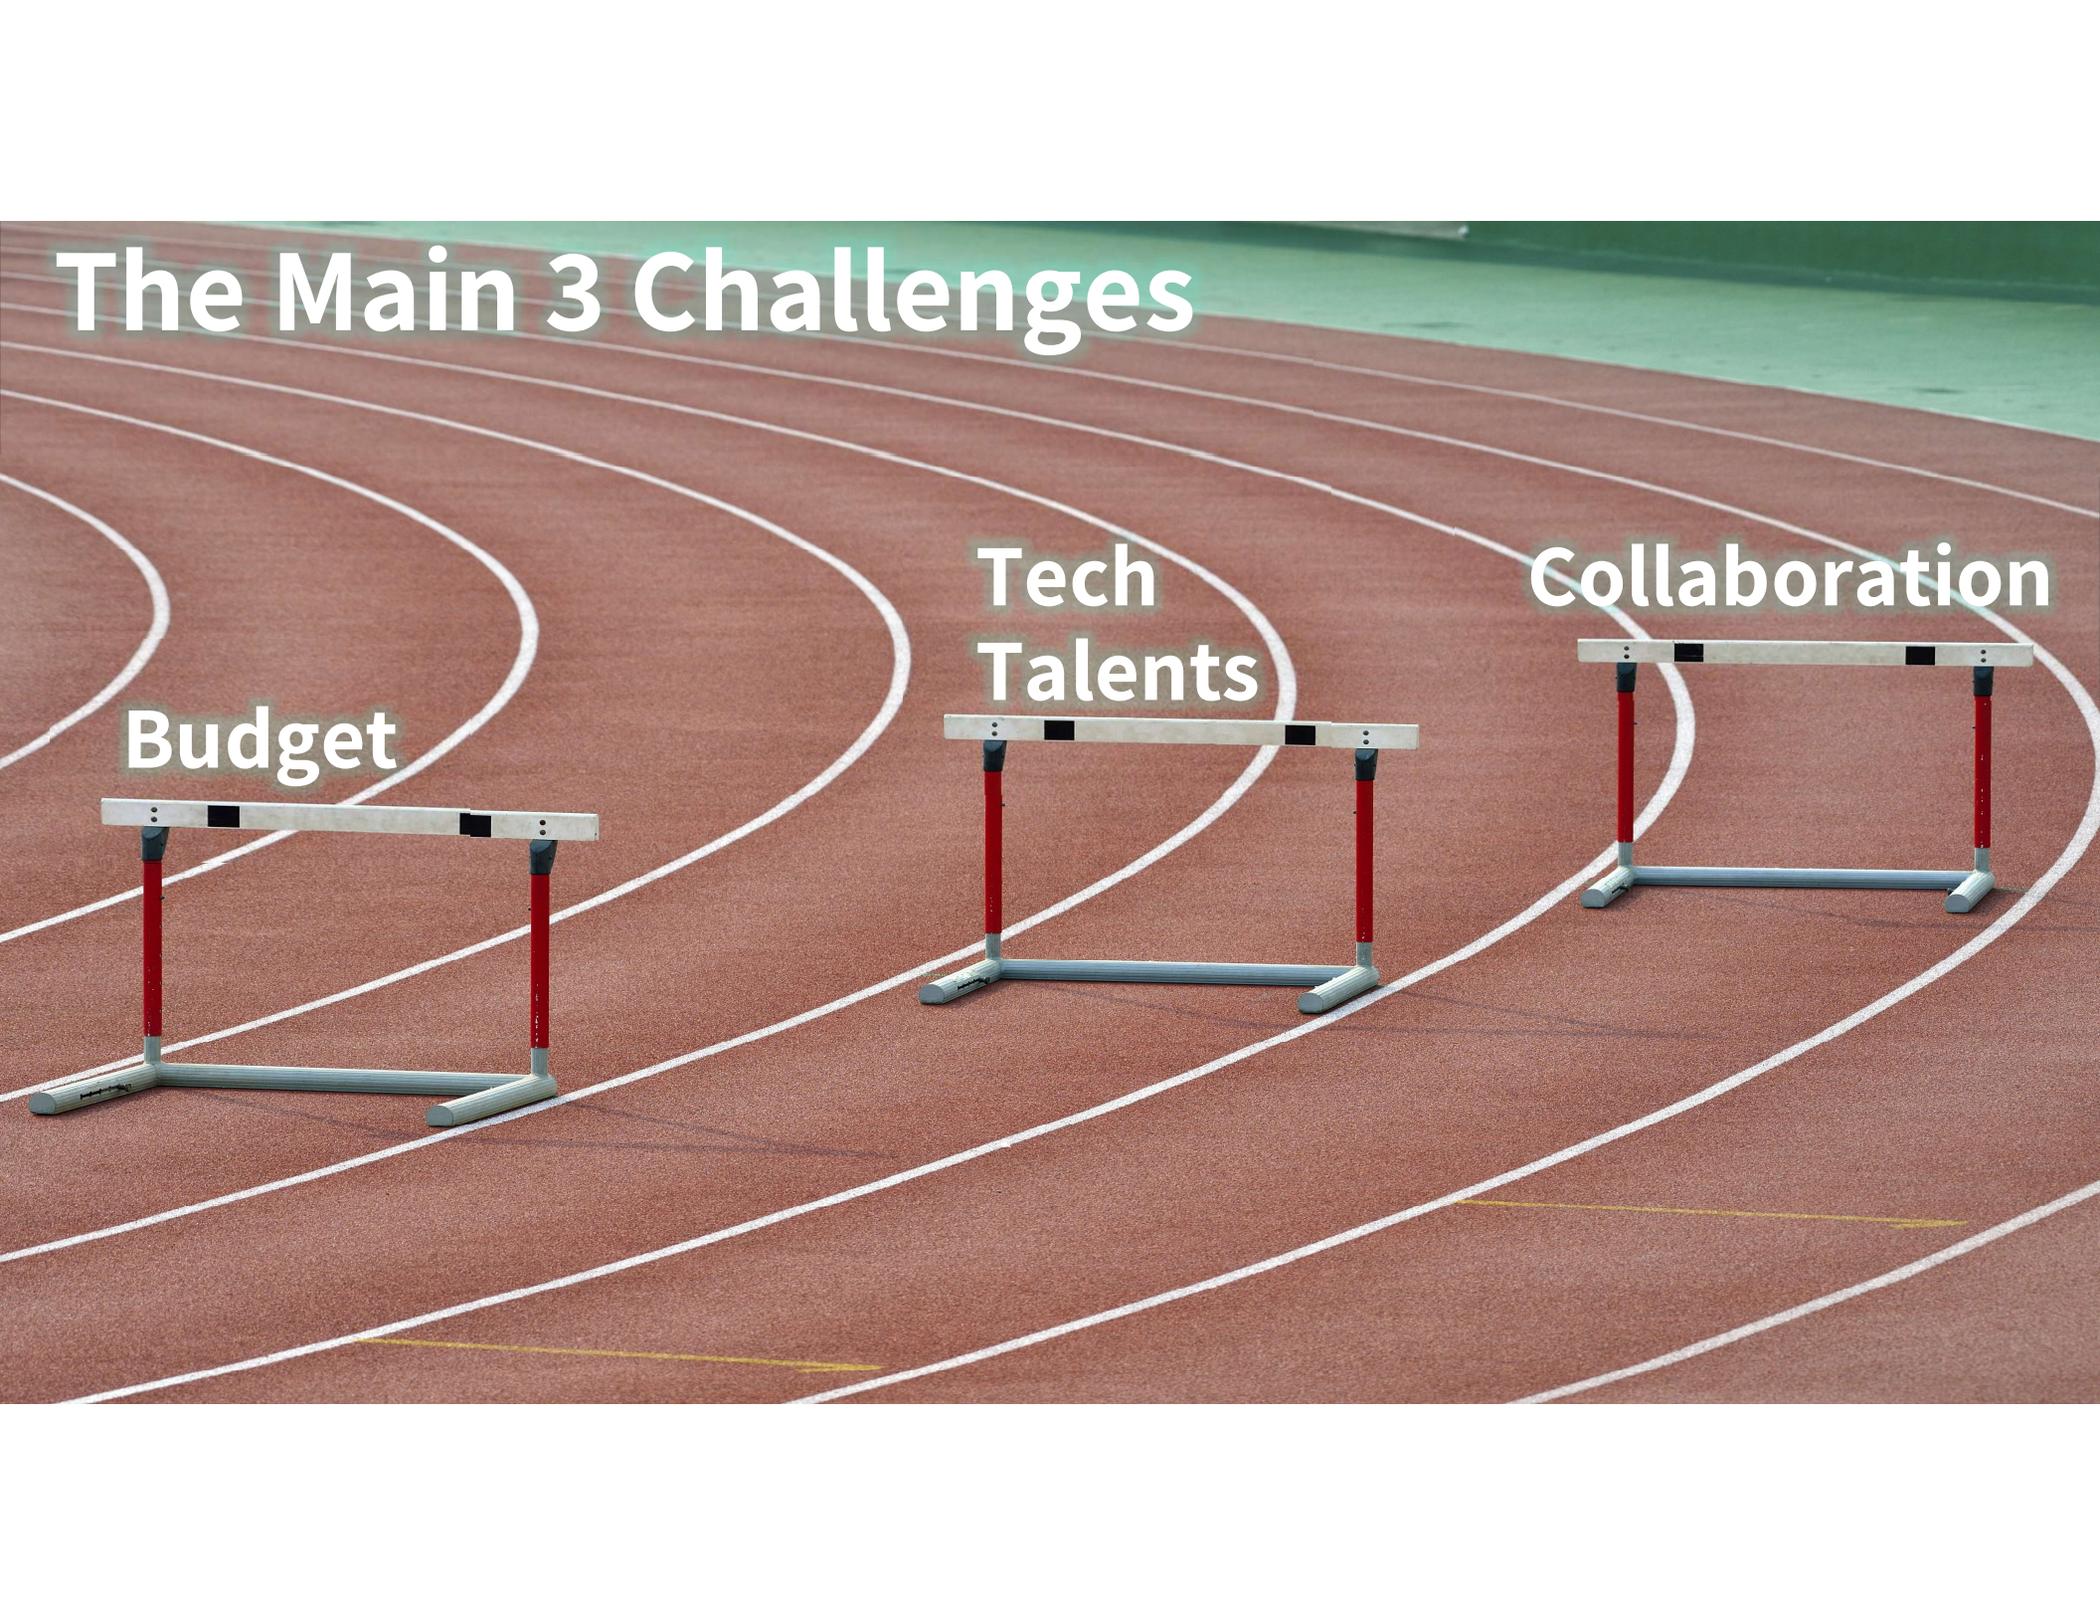

# Collaboration

477,500 22,500 10,000

# The Main 3 Challenges

The image shows a red running track with white lane markings. Three hurdles are placed across the track, each representing a challenge. The hurdles are silver with red legs and black and white markings on the top bar. The track curves to the right in the background, and a green field is visible beyond the track's edge.

**Budget**

**Tech  
Talents**

**Collaboration**

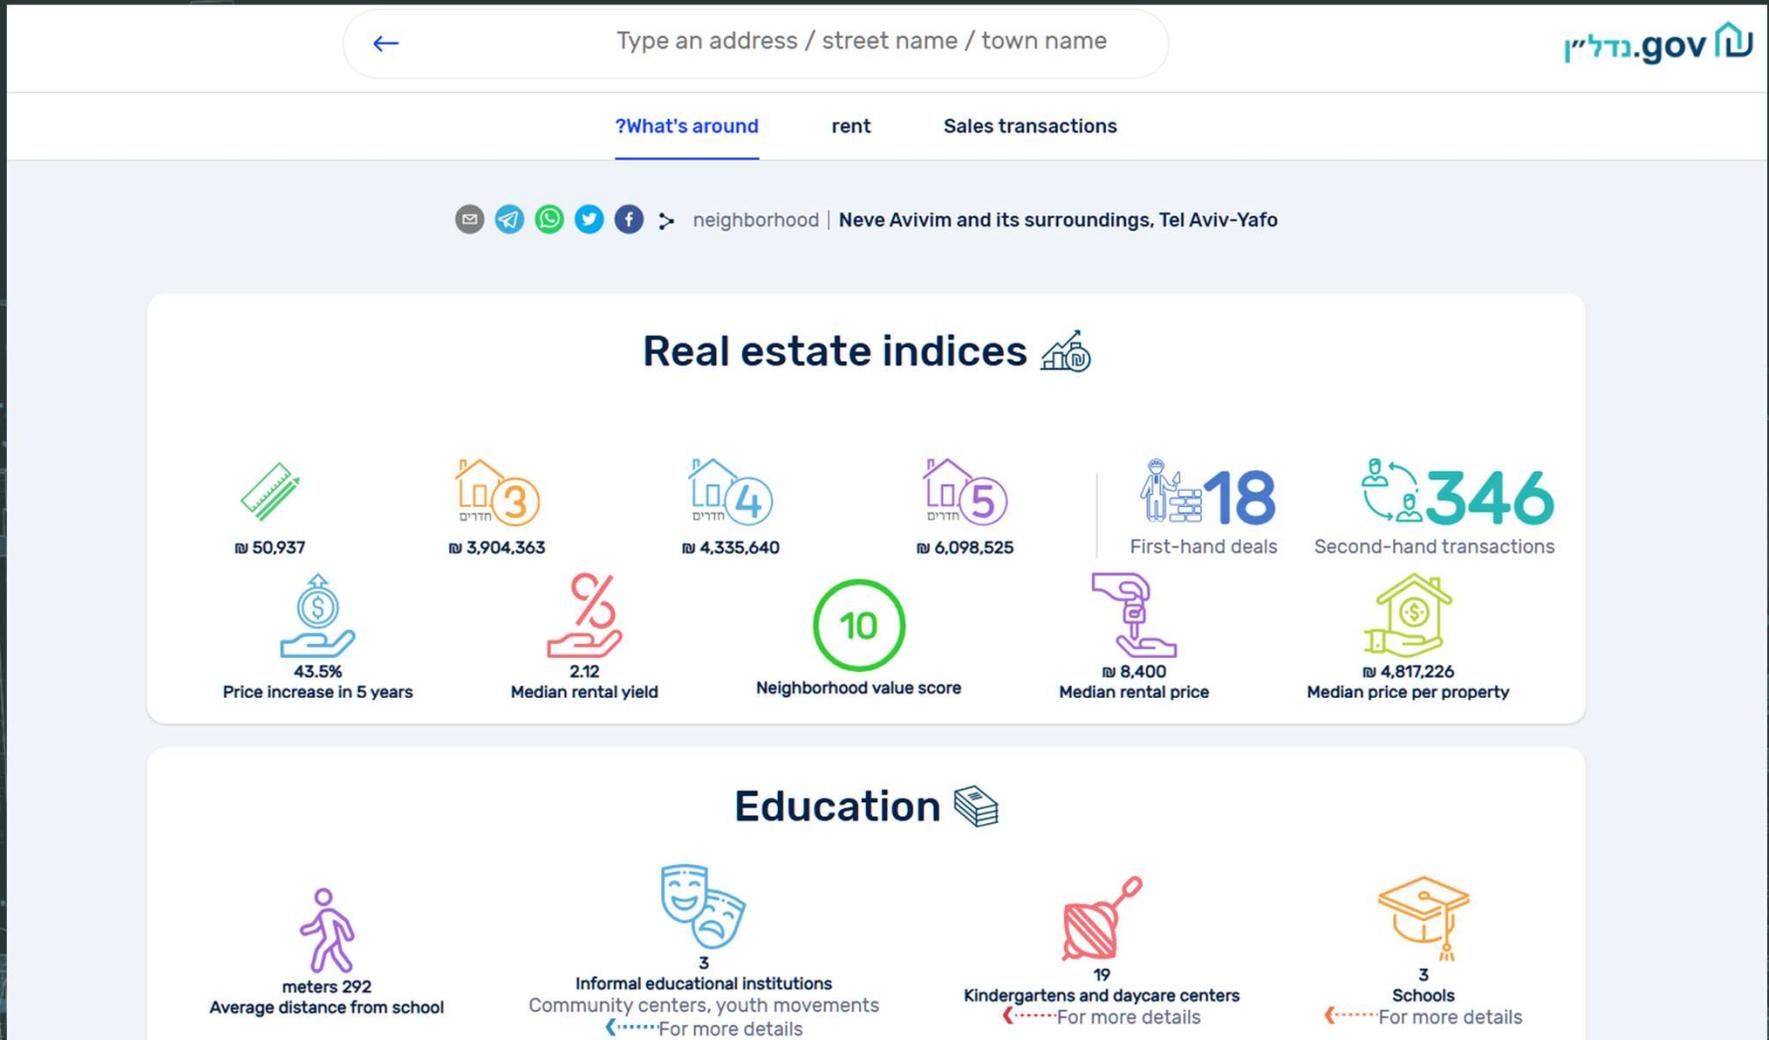

We don't have  
the privilege  
to wait

**How can we take down  
The government silos?**

# Real Estate open data

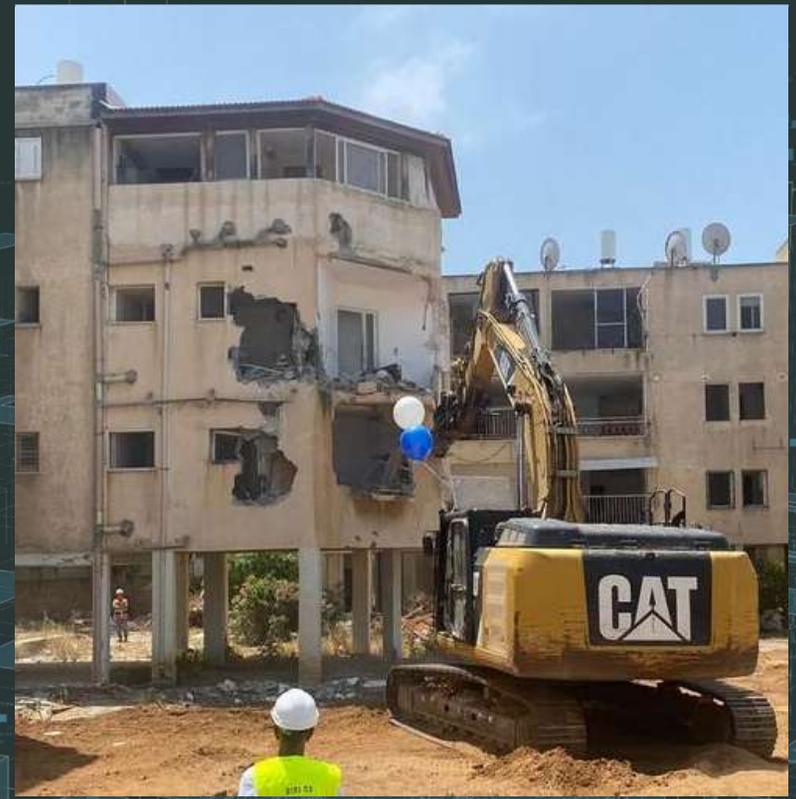

# 10 Bn investment - urban renewal in peripheral areas

AI classification – image from 1982

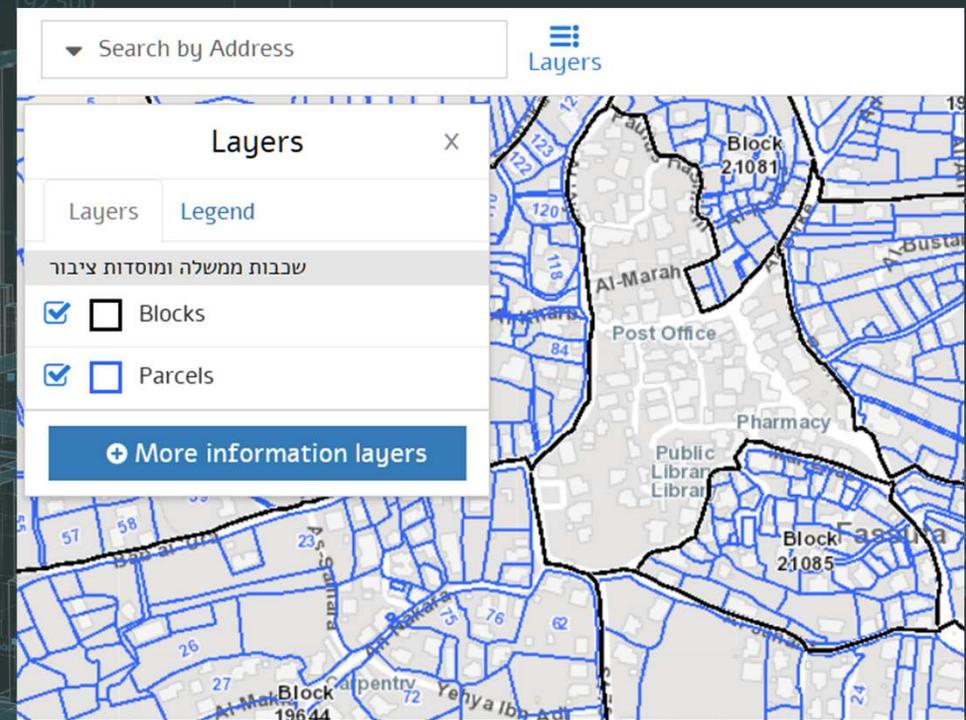

Evacuation and reconstruction

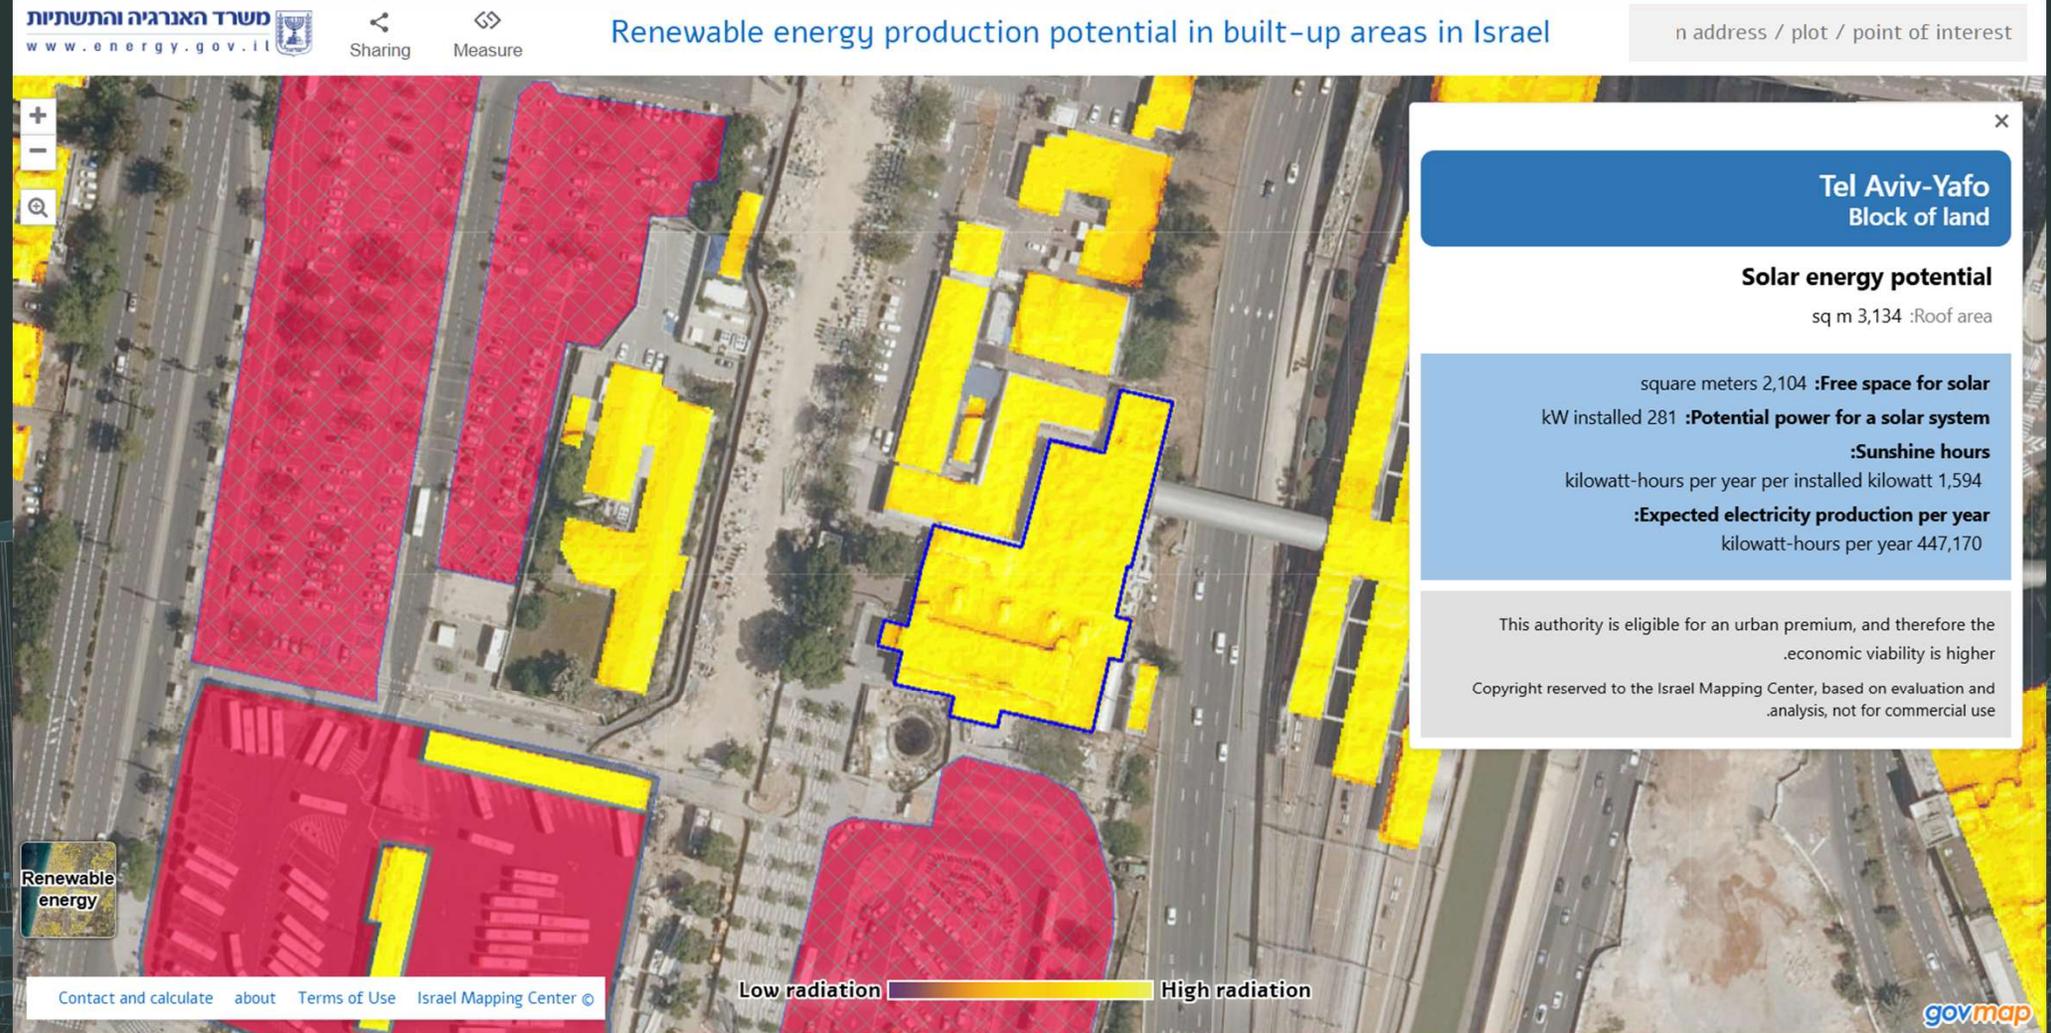

# Diversity & Inclusion – bridging the gaps

## Peripheral, social, and economic disparities

# Energy – Where can renewable energy be implemented?

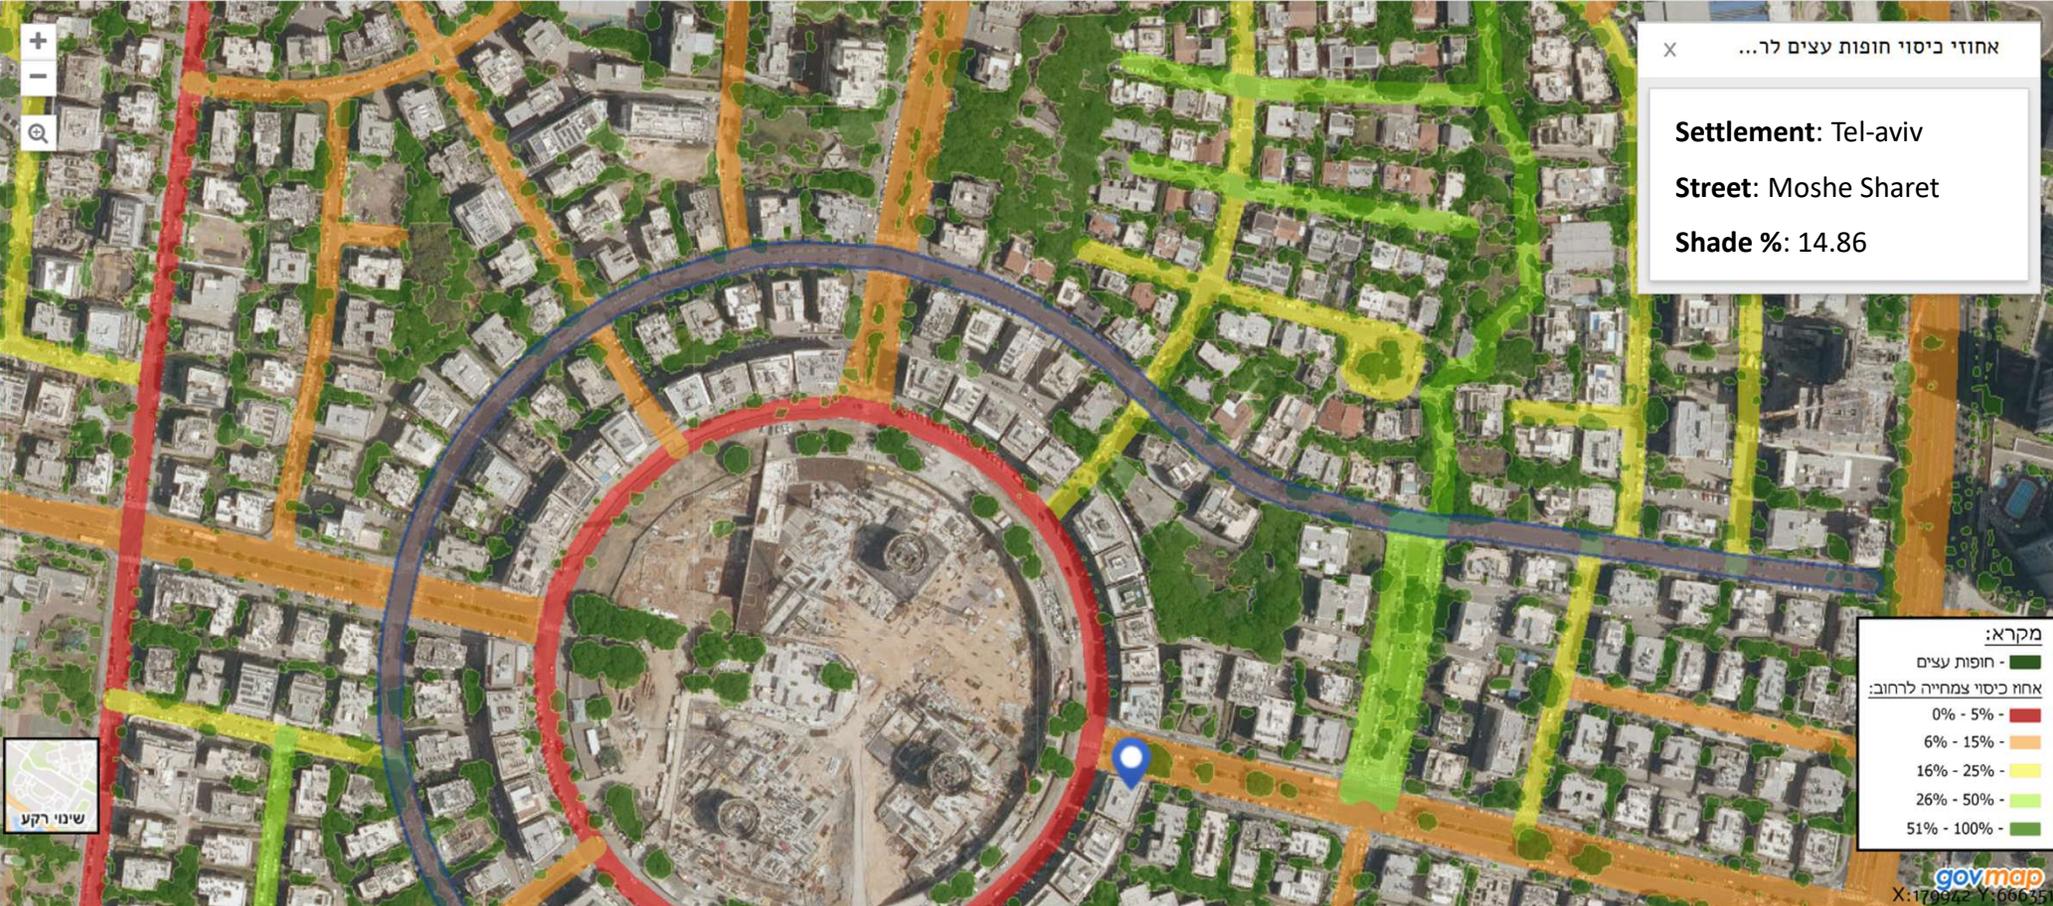

# Climate and Environment – Street Shade Index

Mapping vegetation data and canopy cover index in streets

Survey of Israel

Mapping within the framework of Government Resolution 1022 for shading and cooling of urban space [in the link](#)  
Calculated using machine learning – inaccuracies may occur  
The map was prepared by the Israel Mapping Center.

# Transportation – smart planning decisions

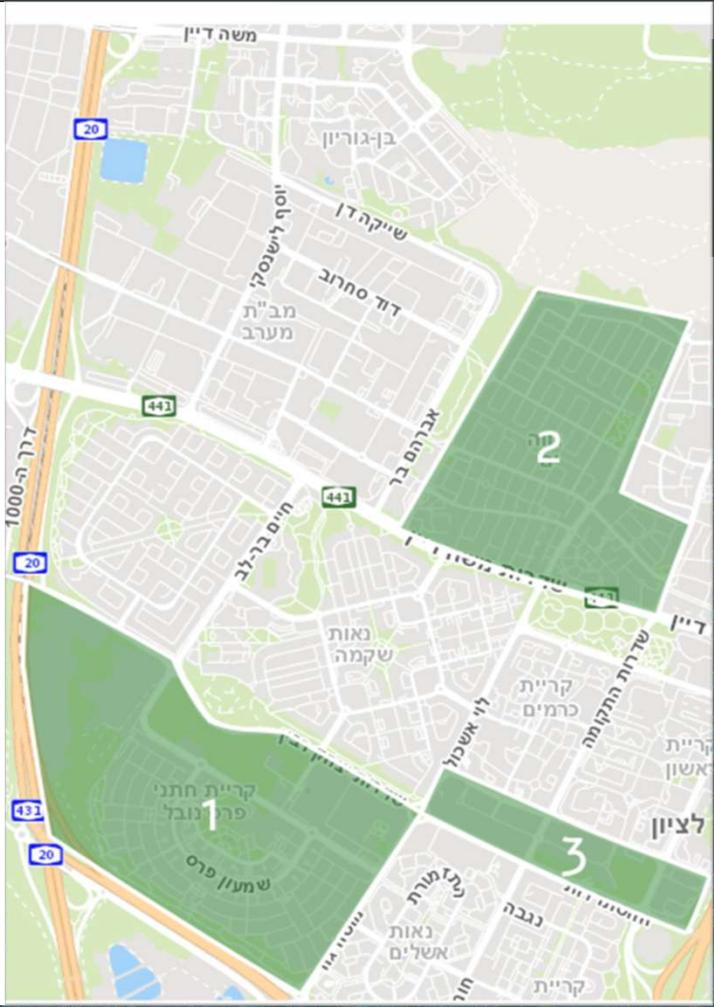

# GenAI - expert technology at the citizen's fingertips

**You**  
Show neighborhoods in Rishon LeZion where the price of a 4-room apartment ranged between 3 and 3.5 million NIS.

**Ask-GIS AI**  
Highlighted on the map are neighborhoods in which the price of a 4-room apartment ranged between 3 and 3.5 million NIS, based on deal data recorded in the last year and published on the Tax Authority website.

- 1. **Neve Hof Neighborhood**  
In the past year, 12 apartments were sold at a median price of 3.42 million NIS.
- 2. **Neve Yam Neighborhood**  
In the past year, 5 apartments were sold at a median price of 3.12 million NIS.
- 3. **Kiryat HaLeom Neighborhood**  
In the past year, 9 apartments were sold at a median price of 3.31 million NIS.
