

Partnering for Purpose

Presented at the 'E-Map' Workshop
8-10 April 2022 in Brisbane, Australia
SHE Maps is a proud partner of the workshop

Inspiring and diversifying the next generation
of geospatial talent in Western Australia.

Workforce shortages for Surveying and Spatial related occupations have been looming for over a decade.

Unless action is taken by the industry, the growing shortfall will continue unabated.

The Surveyors' Trust, 2023

PATHWAYS ZONE

Developing the
skills

A sustainable solution

By boosting confidence in students and building capabilities in teachers to teach real-world industry examples with the use of educational indoor drones, we create a sustainable and repeatable model of engagement.

CLASSROOM DRONE ESSENTIALS

Our foundational program builds **STEM** curiosity and confidence in students and teachers through drone flying & coding.

TEACHER SUPPORT & RESOURCES

Curriculum aligned and industry co-designed resources can be accessed through the She Maps Membership, our online portal of teaching and learning materials. This ensures teacher capability is built so impact occurs after we leave.
